The Report of the Visiting Committee was read, and orders were made thereon, as follows:—
Visited the Home this day, only part of it, found it clean. the inmates orderly and the business going on satisfactorily—on going through the School examined some of the children in Arithmetic—the answering was good, and particularly so in the Senior classes—visited the Farm also, found the Agreement there,—the women digging the ground for green crops—the children engaged picking stones off the wheat—a Horse engaged rolling the wheat, but I consider the implement too light for the purpose—
The Agreement told me it was a borrowed one—I regret to say that the Turnips will not improve by keeping—found some old women selecting them, and I would strongly recommend the Board to lower the price to the County Standard and sell at that price—if not the loss may be great—Manure from what I saw would in my opinion be a better, and a more paying crop—as they appear to be more weighty and more suited to the soil, and will keep longer in the season—the Boundary Fence not yet made, and I must say so badly made is what is yet standing, and with so little indulgence that I rarely if ever witnessed the like, for I don't believe that one particle of the clay was ever trod and would recommend the whole to be taken down and remake, as what remains will eventually fall—The Agreementist states that he wants a Harrow and Plough he does

A Letter was read from the Medical Officer of the Fever Hospital, informing the Board that the Patient who remained in Hospital so much longer than the average number of days were not cases of Fever as the Board supposed, but cases of Chronic Dysentery with ulceration of the Bowels, a very tedious and fatal disease, and were from the W. House

He wished to be informed how he was to act with such cases in future.

Ordered, Such cases must be kept and attended to until convalescent.

A Letter was read from the Schoolmaster stating that he had got notice to attend an examination by the Inspector of National Schools at Wexford on next Wednesday and Thursday and requesting leave of absence

Ordered, Leave granted, the Master to provide a Monitor to take charge of the Male School for those two days.

The Committee appointed last Board day to inspect the Fever Hospital and report as to the best means and probable cost of rendering it available for 60 patients met at the Hospital on Friday last present - J. Gilling, J. G. Cranfield, Doctor Jackson and Captain Hamilton and made the following report "We find the present accommodation ample for 44 Patients but without Convalescent wards. We recommend the erection of a Convalescent Home in four Compartments of 20 by 18 feet (walls to be 10 feet) each - we find a considerable quantity of material in the Sheds which we consider would provide sufficient bricks, timber and glass for such a House in two stories - that the only items of expense will be mortar, slates &c and labour. Such a Building will afford sufficient accommodation for Convalescents, and in case of necessity for 40 additional Patients with a space of say 400 cubic feet for each. As there is so much material on the premises we think the expense will be inconsiderable. We recommend the completion of the two sides of Boundary wall, raising the present wall to a proper height say 9 feet where necessary the length of wall required to complete the two sides is about 23 perches. Scotch Coping would be advisable

There will be two Pines with moveable houses required
 — There will also be required a Pump for the well
 which is about 80 feet deep — with regard to the passage
 from the Workhouse, thro' the Farm, and adjoining fields
 we do not see very great difficulty provided the
 owners Mr. J. Sinnott, Mr. N. Sinnott, and Mr. P.
 Cosgrave will consent to allow a passage to be opened
 — it can be done without cutting up their fields as it
 can be taken along their boundaries
 Signed on behalf of the Committee
 P. Collin

 Estimate and plan according to the above suggestion,
 to be placed before the Board on the 14th Apr^l next,

The attention of the Board is respectfully drawn to the admission of cases of the Small Pox into the Workhouse, as there are many children in it too young

The Reports of the Master and other Officers were read, and Orders made thereon as follows:—

to be vaccinated who would be exposed to infection. I was sent for by the Master to inspect a case on Friday which I had to send to the Fever Hosp. Relieving Officers, he thought, ought to be careful to whom tickets of admission would be given as it is by strict vigilance by them that Small pox would be prevented breaking out in the House particularly as the disease is in several parts of the Union. It would be very desirable that families where Small pox has appeared in their houses, should be kept to themselves or not be admitted to the House, and be given if possible some out door relief, until they are sufficiently cleansed and free from contagion.

Ordered Stephens with her children who has had a child who died of Small pox in the Fever Hosp. to be kept in a separate ward, and all such doubtful cases as may hereafter be admitted to the Workhouse.
