The Medical Officer be go to state that Mary Fetzgerald's infant, was under his care up to the time of its death, and not thriving while in sinfirmary, was treated as an esotern and had every case and attention bestowed on it while in the sursery. The father is a patient in the Infirmary Suffering from consumption, and the infant died of the came disease, and is duly entered in its proper place in the Record of Siekness & Mortality. The reason for its name not appearance in the "weekly died book" is appraised, its food not having been issued from the Informary.

The Redical Officer bego further to add that the Sufirmary is too small to treat pretients of this Class there, as the mothers must be admitted as well and only very special cases requiring separation are allowed to remain in it.

Ordered - The Board consider that opening a new ward is unnecessary, and that the mothers of infants treated out of the Infirmary should attend with the children -daily.

The Report of the Visiting Committee was read, and orders were made thereon as follows:—

The Cugast 1868. The endersigned having been commoned as members of the Salvan Committee to nicket the new pipes connecting the Fener Mospital Cisterns with the new well, and force pump, did inspect them this day. The junction is in perfect working order joints good from end to end but the pipes are not 18 inches in all places. The boses covering the stop cocks are not completed. We consider that the charge for ealso

dishauce of piping in Doudall's contract should not be considered as he had every opportunity of measuring and seeing whathe was about before sending in his technible.

A charge of 15% for covering the stop cocks with oak frames things will be reasonable when the work is completed. Howing inspected the pump and well in the women's good (new Ignare) eve find that after 3 months lest, in course = quence of the pump being out of order, there is only 52 get of water in thewell after the late rained. We consider that it to will menen be a satisfactory supply, and recommend that a luch lead pipe with a cock, he laid from the children; wash house, to the nearest point in the wall of the new yard. Jurnshed with the Guardians observations as to Mr. Green's alleger Gueral mefficiency in discharging his duties as Relieving Officer -Copy - Ruth pierce Inch Gorey. Septs 41 1868, The When at the Breeding of Considers at the Gover Do and an Saturday last, I read a letter trequesting me topay the sum of \$1.14, without delay which was charged tome by the Auditor On account of my signing the Relieving Officer's back as Chairman Ou some occasions in which he states out door relief was ellegally given, otherefore beg tomake the following dejections: 1st - Deamot think it fair for a Ringle member of the Boan to be made accountable, for the acts of all the members present on those days, as in agreat many cases there is a poll taken, on cases of Outdoor Celief, and it would be carried by a majority of the Board, and likely the presiding Chairman bedding against it I think is only reasonable that in such a case as I have stated it to the majority of the Guardians who ought to pay, the Chair nean being abliged to agree with their decision. I'm The Commissioners have at all times leggured the Board of prandians to decide in each case according to its merits and a Relieving Officer may bring forward acuse, which he considers July deserving of out door alief, and eyet when brought before the Board bome quardian Ruswing the party, will entirely the rest of the Guardians that the applicant is not in count. and consequently the party will be refused, on the other hand a party may be brought forward by a Relieving Officer who he may think is not entitled, to receive relief, and a Guardian or Guardians may know the wants of the applicant and on his or their statement relief may be granted. The Relieving Officers book may not then be changed to show the reason why the party was relieved, so that at all times the Relieving Officers book may not show the exact cause why relief was granted. 3 nd - In one of those very cases which the Presiding Chairman is Charged with, it is entered as the reason for giving relief (want of event), I for one Guardian deny that such a statement was ever read before the Board, and I believe every other Guardian will do the same, and from Cooking at the Melieving Officer's Book it is plain the words (want of work) was written

a different time and with a different fren & I don't hesetate to say that if Green the Relieving Officer has proved that it was written at the same time of do not believe it nor any of the Guardians either who have seen it. and he was told so at two different meetings of the Con ardians. and I am Confident if the Commissioners saw his Books they would be of the same opinion: It is a plain fact that it was the fault of the Relieving Officer that the Guardians if relief was granted illegal as in as case did it occur with the other Relieving Officer. Relieving Officer Green has been advised on man occasions to the Grandians to resign on account of the way he Kept his backs; but of course he payo no attente to them, and Ithink it is only fair for the Commissioners to dismiss him, he being the party to blame not me, and Lam surprised the auditor dit not recommend the Commission to dismiss him, from the way in which his books are thept instead of evanting to charge those sums to the Guardians who, I am certain, wished to act up to the law and do their duty to the poor as well, however under the circumstomes if the law is against one & must submit, but I am doubtful if I can prove that those entries were made after the books were laid before the Guardian whether the Law will compel me topay it or not I have therefore made the foregoing objections and have stated

Report of a Committee appointed totale stock on the 29th. September 1868.

We found clothing Stock to correspond with the entries in Clothing Materials Book and Clothing Receipt Book, we consider the quality of the Clothing inferior and we would be selected, when next accepting tenders for yearly aupplies that the men's clothing blanked he washed and placed on shelves as is done with the women's clothing

521 in another department, Ordered. The stock of shoes is very low, and deficient in qualitywe consider a new supply urgently required, we would also suggest that the space shoes should be selected, Kept clean, and placed on shelves, Ordered. The quality of the soap we believe to be enferior, and from its affiness, it is likely tolose weight considerally from storage The provision and necessaries stock is correct except the Coal which is about 19 tous short, but this deficiency existed when the present Master took office, and as the Board is aware of the cause, we recommend it to be struck off the Book. The washing soda is about 14 stone over in stock. Codward Foley Ordered - This matter to be set right in the books, as soon as 26 Chimons J. Dustram Clerk the present stock in the coal store is considered, The Reports of the Master and other Officers were read, and Orders made thereon as follows:-3 nd October 1868. Ellins, relative to the concentration of necessaring the Workhouse of Gorey Union and the disposal of the corp of Potatoes grown in the Workhouse ground, Commissioners for administering the Laws for the Pelif of the Pour in Heland desire to inform the Board of Guardians that they have received a Report from their Varpecter, Mr Robins together with the evidence taken whis recent enquery ento these matters, the latter of which they enclose for the quardians information, with reference to the consumption of necessaries

524

Hobinson States that he found that the quardians wished igiquing to be made regarding soup soda anderels: and he has attacked to the evidence returns showing It quantity of these articles charged in the Provision Account as consumed in each week from the 6" October to the 13 that august 1868 Mr Robinson abserves that During first six months of this period the present Master of the Norkhouse was not in office but that the quardians were descrous to refer to the consumption before his appointment with the views of comparing it with the consumption since, It appears that the eviden co with reference to the consumption of Loap was taken with the view of ascertaining whether the quantity charged as consumed had really been consumed or not - The provission account shows that during the last half year the late Master held office, 42 lls a week was charged for y wreke and 56 the a week for each of the remaining weeks: and that from the 25th of March 1867 (the lime Mo newsons became Master) to the 4th of Suly last, 56ths a week except the week ending the 4th of april. Mr Robinson reports that up to suly last it was the practice of the present Master, and of his predecessor, to give the Matrow a box containing 112th, at a timo, which the distributed to the Hospitals and the other Departments of the house; and that when this was

finished the received another: and therefore, while the was given a box every fortnight. 56lbs a wreke was the proper quantity to charge as consumed. The Matrow in her evidence does not make a very decided Statement as to the actual quantity consumed during the last half year of the late Masters tenur of office or during the first ninomouths of the present Masters tenure, and the says "as wall as I recollect during the last six mouths the late Master held office. I received from him about 112 to Every fortnight. I never received more: and with reference to the following summer the lays "the Master always gars me a box containg 112 lb. which hever lasted less than a fortnight but some times it lasted more". It appears that during that timo there was no limit to the consumption, and that the Matron was allowed to uso what the thought necessary, but that before Christmas last the Master and Matron had a conversation on the Subject, and that the Mation Spokes dicidedly as to the consumption since that time, and sune that from Christmas last to beely a "box always lasted more than a fortnight, and the average "consumption findending Hospitals) was from 3 juli " to 42 lbs a work; and the added that the wirer redlected the consumption exceeding 42 lbs a Weste. Mr. Robinson States that the Master Lad no Evidence to rebut the matrons testimony, and that assuming that the masimum quantity the named, vis. 42th. Lad been used every week, it will be seen that from Christma 1869 to July 4th last the Guardians were (with the exception of our week) overcharged about 14 les a work; but that it must be observed that in August their was a dusplace of 112th in store, which would not however, amount to one there of the quantity which appears to have been overcharged the Masters responsibility lowerer regard to this matter. cannot, in fairness to hild trestend over the whole of the period referred to as he was ill, and unable to discharge his deety from march 2 nd to april 13th during

326

which time the Workhouse was in charge of the Lehoolmaster and Matron the bleck having kept the books. But he was responsible for the overcharge during the him weeks from Christoness to the 2mg march, and for the twelve weeks from the 13th of april to the 4th of suly the surplus found in ston in august, being inadequate to meet the apparent worcharge during The latter period. It is also necessary to tobserve that on taking Stock on the 25th of march, there was a deficiency in Store of 49 lbs of toap, notwithstanding the former or Evcharge, but the Masters liability for the boholo of the deficiency would of course bo lessened by the Cercumstance This having been unable to discharge his duty during the previous three worker to regards the Lotda, it appears that the Master admets that he "issued it fas a general auto) by queso", and that when he first took office he charged 16th a week, but after a few weeks raised the charge to 42 lbs. a week which he usually charged fines. It seems, however, by the Statements of the women who received the soda that they did not get more than 22 lbs. a week; but it must be observed that for wine weeks. The Master ded not Charge the Guar dians with any Loda though the usual quantity was consumed, and that on taking Stock in August. though 140 lbs appeares to be the Stock on hands by the Books, their was about three times that quantity in Store. With respect to the boals, it is not alleged that there has been misappropriation on the part- gang of the Officers; but it appears that there is not Suggicient check over the Concumption, and it is Said that when the Lever Hospital was opined an additional allowance was required there and that the Supply there is not limited. The formidioners do not think that this matter requires any further

for each Department of the Workhours and Hospitals giving the Andieal Officero authority to order in meting temporarily, whatever additional allowance he may deem necessary for any particular Ward The Charge against the Master as to the Potato Crops is that he did not dispose of it properly for the benefit of the Guardiano, as he has only lodged to their credit, on that account the Lum 719/4. to ascertain the value of the Crop. as part remains underg, and many of the Potatoes have been taken from the latter portion; but that as hear as can be ascertained he thinks it may be estimated that the portion duy ought to have produced at least 40 Hours and that taking them to have been on an average worth if a stone, the part of the Crop duy ought to have been at least \$ 2.0.0. It appears that the master gare down of the Potatoes to the Officers and used some himself, while in liveral instances presper inmates of the Workhouse and Sospitals received them. It was not proved that any had been Sold, and the money not accounted for, but the general management and disposal of the Crop evineed great Carelessness on the part of the Mades and great want of regard for the Guardians interest. On reviewing all the facts elicited at the enquiry it becomes necessary to take the Maters Conduct into Consideration with the Vew of determining whither he is a peoper pessons to hold Such a responsable situation. in the matter of the Loap there can be no doubt that the quantity charged as consumed Lines Christmas last, was not issued to the Matron; and the Masters explanations on the Subject

is wholly insufficient and uncatisfactory; having Spoken to her at Christmas about the Consumption, and told her that a boy must last more than a fortnight, it was afterwards his duty to ascertain whether his orders had been carried out, and what the actual Cousumption was and to have given the speardians credit for any laving effected, instead of Continuing the Lamo Charp of stells a week as before. Even if the overcharge may be assisted to Carelisoness, and not to misappropriation of the article, the manner in which the books ever tept, and the Stores managed, evinced freat inefficiency and want of caro, which was still further exhibited by the mode in which the Loda was issued and Charled for The errowers entries in the books in agard to these matters, and want of accuracy shown in Reeping the accourts, would seem to make it necessary to Consider whether any reliance can be placed in accounts and Broke tept by Mr. Newsome; and the Commissioners accordingly request that the Board of Guardians will be good enough to state their opinion whither under the circumstance, they can in futuro place Such confidence in him as to justify them in retaining him in the Office of Master of the Workhouse. You will be good enough to return the evidence to this office when done Eder Fe the Commissioners B. Banks Chief Clerk.
