The Report of the Visiting Committee was read, and orders were made thereon as follows:—

Visited the house & found it clean & in good order. We would call the attention of the Board to the range in the Infirmary. & the rendering of roof in the women's cock loft, should no order have been made on last report, we would also call attention to the state of the stove in the girls' School room which we consider should be put in order at once, the rendering of the roof in ^{the} Chapel requires repair & the porch is very untidy—there should be in our opinion wire net put over the openings of the windows in the towers & a new weather board to the door into the Women's yard from the Infirmary—

The Clerk's Report of Vaccination was read—(this on the First Meeting in every month)—number of successful cases:—

The Report of the Visiting Committee was read, and orders were made thereon as follows:—

I have this day visited the Workhouse, & find each department clean & in fair order. Bread, meat & milk of good quality. Some paring is required in the Kitchen yard. I do not consider that the wishes of the Board have been carried out relative to giving out door employment to the Boys, the portion of ground set apart to be cultivated by them is not in a creditable state, it now requires a deep winter digging

Signed Henry Ringwood

Ordered that a Comtee consisting of Mr Kirk, Dr Owen, Messrs Earl & Butler be appointed to inspect the state of the ground with the view of employing the boys profitably

The Master begs to report with respect to clothing as follows. There are 63 men in the house, & only about 27 suits of the clothing in wear require repair. There are in store ready for issue when required 41 suits of new clothing, & 9 suits of old clothing which he thinks quite sufficient for the approaching winter & spring - Approved. There are only 19 boys in the house, but they require new clothing. There are in store only 13 Jackets, 11 Vests & 30 Trowsers. The Jackets & Vests in store & in wear are very much worn, but the Trowsers are good. The Master thinks it would be well to make provision for 25 or 30 boys & from 75 to 90 yards of tweed will be required to make new Jackets & vests for them - 75 yds. There are in store 2 p^r Mens' Shoes, 11 p^r of Womens' Shoes, & 11 p^r of children's shoes, & the Master thinks the Shoemaker will require an assistant for about 3 weeks in order to get up a sufficient stock of shoes, & to keep those in wear in repair - Order. The Master to report to the Board next B^d. day at what rate he can obtain ~~other~~ an assistant -

The Reports of the Master and other Officers were read, and Orders made thereon as follows:—

There are 99 Women & 34 girls & small children in the house at present & the Matron has in store only 20 suits of clothing for women & 13 suits for girls & these are all old & bad. She will have to get clothes made up as quickly as possible & can apply for the materials as required. Enough has been ordered for the present - Approved -

A hide of Butt & a hide of Kip received from W Travers submitted. Examined by a Committee who reported that the hide of Butt is not all equal to sample, but it having been the practice of the Board to take whole hides portions of which are not equal to sample & as it is plain the Contractor took this into account when making the Contract, the Board accepts the leather sent in the greater part of it being equal to sample, hide of Kip also accepted -

The following Orders of the Local Government Board were laid before the Board, and directions given thereon as follows:—

Work House, Gorey
13th Dec: 79

The Right Hon. the Earl of Mountnorris
Chairman, Board of Guardians.

My Lord,

In consequence of recent discussions at the Board, I feel that in order to set myself right with the Guardians and with the Public, it is necessary to make the following statement -

I am now 4½ years Master, and during that period not one pennyworth of Union property has been wasted, or lost, or found deficient, and I estimate that by attention and careful management I have saved the Union upwards of £100 per year in the expenses of this House - Besides the Farm during my period of office has produced a larger profit than heretofore
an

an average of £ 75 per year - or over
£ 300 for last four years -

I request your Lordship will test
this statement by referring to the
Books, and to the Clerk, Mr. Creighton,
who, though no friend of mine, yet any
opinion he may give on the subject
may be relied on, for he keeps the
accounts regularly & accurately.
He often remarked to me on the
closing of each Half years accounts
the great saving that had been
effected especially under the head
of Establishment charges -

If the clerk should not be able to
give a satisfactory answer today,
I hope your Lordship will have the
Kindness to direct him to prepare
an account against the next meeting
of the Board, shewing the comparative
expenditure under the different heads
with any previous period of 4 years

and the average number of Inmates respectively during each period -

This will enable the Board to form an accurate judgment upon the subject - When leaving, I intend to hand over to my Successor everything complete, and I expect to have no deficiency, but I will have an overstock in some articles of Provisions - especially Bread - the result of saving all that was possible & allowing nothing to be wasted.

I may add that the saving has been effected without depriving ~~any~~ ^{the} Inmates of the smallest particle of their allowances which they always received from me regularly, & fully, and of the quality contracted for - and as to this I would refer to D. Allen. I hope my successor will serve you as faithfully & do as well for the Rate payers.

It is pretty well known that no
of our predecessors did not

I request your Lordship will
have the goodness to read this
letter for the Board

I have the honor to be
my Lord

R. Reighton

383

The Committee appointed by the Board of Guardians to consider the Tenders for building a Concrete Tank at the Well at Camolin met last Tuesday, and they consider that under present circumstances the Tank cannot be built so deep as intended.

They would Amend the Contract by having the Contractor build a suitable Style across the Railway fence giving easy access to the Well, instead of building the Tank to the height advertised. They propose to raise the tank $2\frac{1}{2}$ feet high instead of 3 feet, the Spout to be as high from the surface as can be, allowing the waste water to leave.

The Style to be made 1 yard wide of Stone Steps, an Iron Rail on top fastened to iron Standards in the Steps.

I agree to the ^{proposed} ~~proposed~~ alteration in the proposed work at Camolin to be done for the sum of £3. 10. 0 to find all materials

School Inspector's Report

Boys' School - The answering of the pupils was not so satisfactory as might be expected from the constancy of the attendance. The present Teacher cannot be considered responsible - It is expected however, that he will exert himself to remedy the defects observed during the examⁿ. - Greater attention on the part of the pupils is absolutely necessary - at present, they exhibit an unusual degree of indifference on the subject of their education - they seem, in fact, unable to appreciate the advantages they enjoy - The School room is clean - Ventilation & heating attended to - a larger supply of Coal during the cold weather, would be required in a room of such dimensions - The personal cleanliness of the pupils is satisfactory -

Girls' School - The proficiency is quite satisfactory. Schoolroom clean very well heated & ventilated, Personal cleanliness of the children in a satisfactory state -
