The Master reports that there are two children in the house at present whom it would be advisable to send out to muse ME. Palmer the Relieving Officer to provide hurses for these Children

Is the I have examined the children in both I chools. In the Girls I was much pleased with the attention which appeared to be individually pais to the children, and with their general progress. Mip I veil has much improved her method of teaching and the effect on the pupils is quit apparent, There is still however, a deficiency in her not sufficiently descending to their capacity and causing them to fully comprehend and explain in their own simple language the subject of their lessons.

In the Boys school there is a lamentable

defect in this respect, to be found even in the first class, composed as it is of the small lads, yet smart and of much natural intelligence In it also there was a total neglect even of the rudiments of Grammar The Master promises in future to supply this omission, With these exceptions I am satisfied with the attention bestowed on the Boys James Lacy The attention of the I chool mistress & I chool master called to this report

I am answires to represent to the Board that the scale of Sectary as at present used in the Informary and Lever Hospl is in my opinion badly arranged and requires afteration. I find it impossible to met the wants of the p-alients in the present classes of dectary satisfactorly in some cases they have more than they can eat in another they are starved. amesied I give a dectary which I trust if approved of will prove more satisfactory and less especiative.
